Introduction

The project website is the main platform for communication and dissemination activities for the ICEI project. A preliminary version of the website became available in February 2018. The final version of the website went live in April 2018, before the first public event of the project. Since the launch, the dissemination team has regularly updated its contents; news and press releases have been uploaded, as well as events and media clippings. Technical information about the procurement process, such as the presentations, has also been made available on the website, along with a Question & Answers (Q&A) section. Google Analytics has also been installed to allow the number of website visits and visitors to be viewed.

Website structure

The URL for the project website is www.fenix-ri.eu. The following image shows a general view of the home page.

The website structure is organized in 5 main sections:

1. **About Fenix:** In this section we can find more information about the Fenix infrastructure, the ICEI project and its objectives, as well as the partners involved in the project. The two subsections are:
 - **Objectives**
 - **Partners**

The screenshot shows the 'ABOUT FENIX' page of the FENIX Research Infrastructure website. The page features a navigation menu with 'ABOUT FENIX', 'SUPPLIERS', 'NEWS', 'MEDIA', and 'CONTACT US'. The main content area is titled 'ABOUT FENIX' and contains the following text:

The European ICEI project is funded by the European commission and plans to deliver a set of e-Infrastructure services that will be federated to form the **Fenix Infrastructure**. The distinguishing characteristic of this e-Infrastructure is that data repositories and scalable supercomputing systems will be in close proximity and well integrated. First steps in this direction are planned to be realised in the context of the European Human Brain Project, which will be the initial prime user of this research infrastructure.

The objectives of the ICEI project can be summarized as follows:

- To perform a coordinated procurement of equipment and related maintenance services, licences for software components, and R&D services for realizing elements of the Fenix e-Infrastructure;
- Design a generic e-Infrastructure for the HBP, driven by its scientific use-cases and usable by other scientific communities;
- Build the e-Infrastructure having the following key characteristics:
 - Interactive Computing Services
 - Elastic access to scalable compute resources
 - Federated data infrastructure;
- Establish a suitable e-Infrastructure governance
- Develop a resource allocation mechanism to provide resources to HBP users and European researchers at large; and
- Assist in the expansion of the e-Infrastructure to other communities that provide additional resources.

2. **Suppliers:** This section is dedicated to the procurement process. It contains information about the two events celebrated for the market consultation, useful documentation and questions and answers raised during such meetings. The subsections are:
 - **Q & A**
 - **Development needs**
 - **Public information event**
 - **Request for information meetings**

The screenshot shows the 'INFORMATION FOR SUPPLIERS' page of the FENIX Research Infrastructure website. The page features a navigation menu with 'ABOUT FENIX', 'SUPPLIERS', 'NEWS', 'MEDIA', and 'CONTACT US'. The main content area is titled 'INFORMATION FOR SUPPLIERS' and contains the following text:

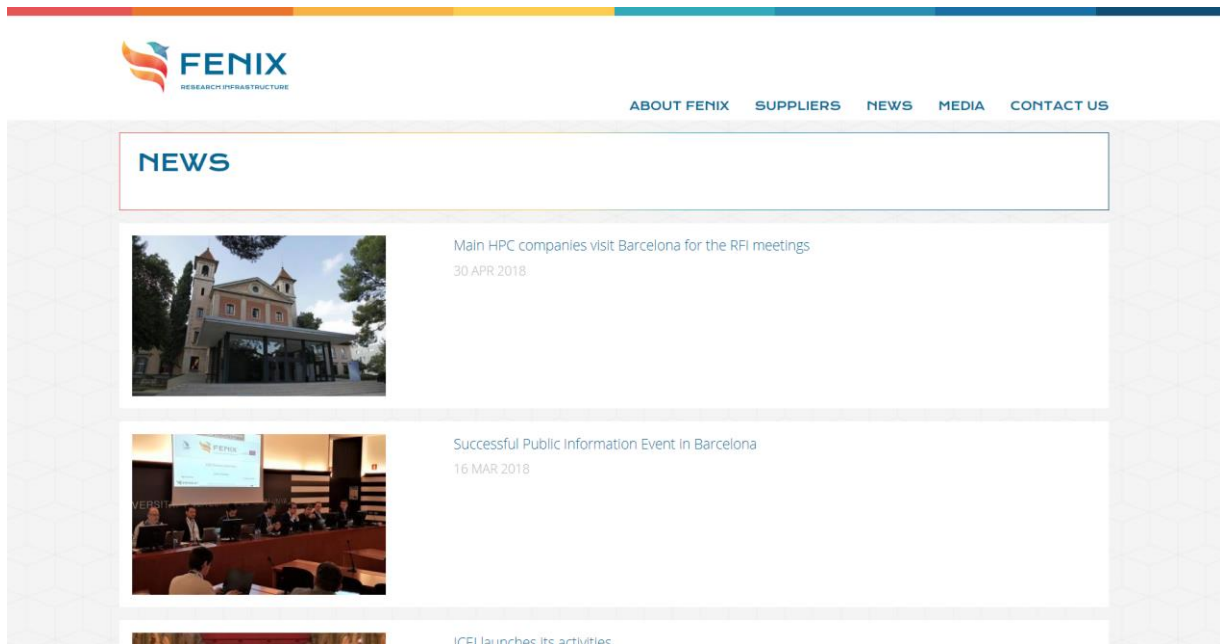

All the information regarding the procurement process is available in this section. More information will be uploaded and/or updated when necessary.

Please visit each section for further information:

- **Q&A**
- **Development needs**
- **Public Information Event**
- **Request for information Meeting**

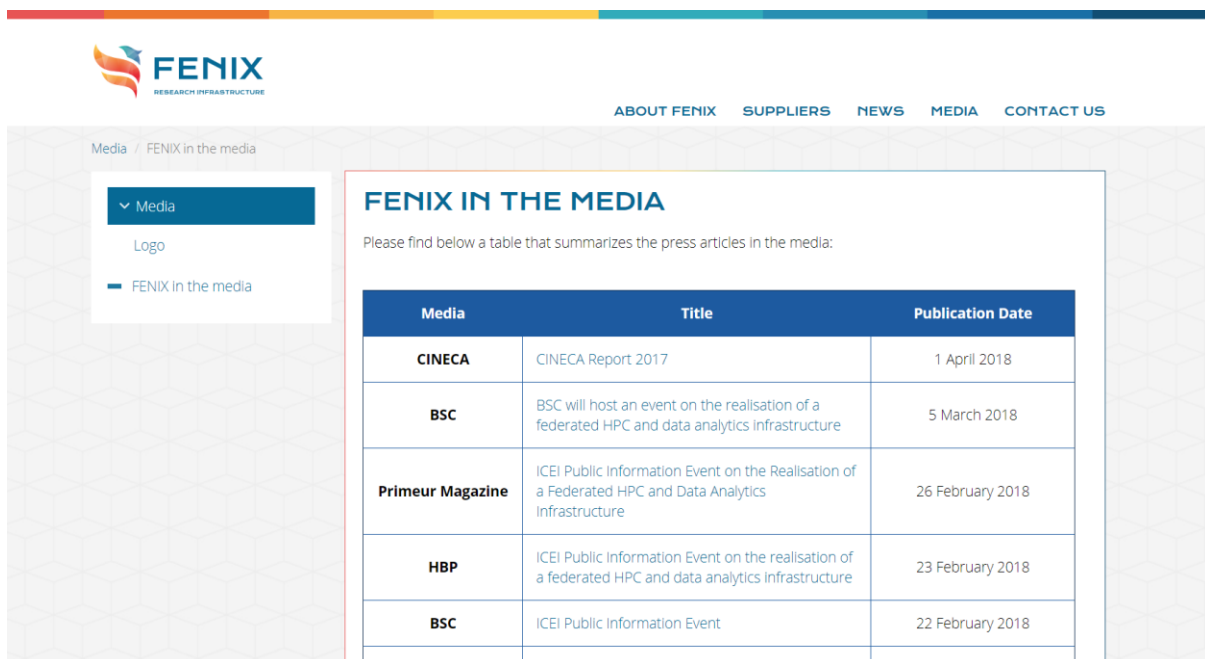

If you need further information, do not hesitate to contact us.

3. **News:** This section is dedicated to the project related news.

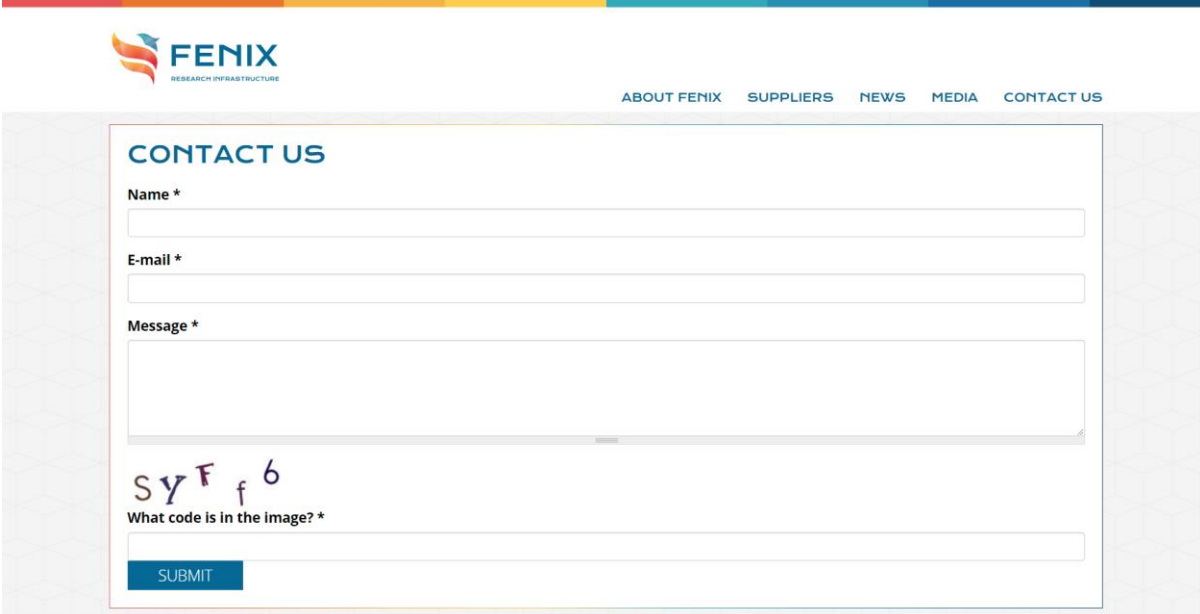

4. **Media:** There are two pages in this sections:

- **Logo:** In this page, the different versions of the ICEI logo can be downloaded
- **ICEI in the media:** In this page, all the press impacts of the ICEI project are summarized.

5. **Contact us:** This section contains a form in order to get in touch with the ICEI project consortium

The screenshot shows the 'CONTACT US' page of the FENIX website. At the top left is the FENIX logo with the tagline 'RESEARCH INFRASTRUCTURE'. To the right is a navigation menu with links for 'ABOUT FENIX', 'SUPPLIERS', 'NEWS', 'MEDIA', and 'CONTACT US'. The main content area is titled 'CONTACT US' and contains a form with the following fields: 'Name *', 'E-mail *', 'Message *', and a CAPTCHA image with the code 'SYF f 6'. Below the CAPTCHA is a 'SUBMIT' button.

Next steps

The website management will be included in the deliverable D2.2 Dissemination and exploitation plan. The website will have a central role in the dissemination strategy defined in D2.2. The analysis on Google Analytics will be presented in both 2.3 and 2.4 Dissemination and exploitation reports.
